ALLBRIGHT LAW OFFICES

The diagram consists of a collection of mathematical symbols arranged in a structured, grid-like pattern. The symbols include:

- ∞ (infinity)
- $\leq$ (less than or equal to)
- L (capital letter)
- $\check{N}$ (N with a checkmark)
- $\check{n}$ (n with a checkmark)
- $\triangle$ (triangle)
- $\geq$ (greater than or equal to)

The symbols are arranged in a way that suggests a complex mathematical relationship or a proof structure, with some symbols appearing multiple times and others appearing only once. The overall layout is organized into several rows and columns, with some symbols appearing in a more central position and others on the periphery.
